SUMMARY

I am a Lecturer in Robotics and Automation with a master's degree in Robotics and Computational Intelligence Systems and industry experience in industrial automation, computer vision, and IoT development. My background combines teaching, applied research, and hands-on engineering. My research interest is to develop intelligent robotic systems that can adapt to and operate reliably in unstructured environments.

TECHNICAL SKILLS

Robot Learning: ISAAC LAB/SIM

AI & Machine Learning: Python, PyTorch, reinforcement learning dexterous hand & locomotion, deep learning, computer vision

Robotics & Automation: PLC programming (Keyence, Mitsubishi), industrial robotics (6-axis, SCARA), HMI design, STM32CubeIDE, Embedded C/C++, CAD Design (SolidWork), MATLAB

IoT & Embedded Systems: LoRaWAN, MQTT, ESP32, STM32, Raspberry Pi, Node-RED, Arduino

EDUCATION

MS – Robotics and Computational Intelligence Systems

2020 – 2023

King Mongkut's Institute of Technology Ladkrabang (KMUTL), Bangkok, Thailand

GPA: 3.88 / 4.0 (36 credits) Thesis Oral Defense: Grade G (Good)

Thesis: *Finding Picking Point Using Straight Line Detection of Label Attachment Machine*

Relevant coursework: Machine Learning, Artificial Intelligence, Big Data Analytics, Internet of Things, Modern Control Theory, PID Controller Theory/Design/Tuning, Applications of Nonlinear Control to Robotics, Introduction to Industrial Robotics, and Research Methodology.

BS – Production Engineering

2014 – 2018

Chaiphaphum Rajabhat University, Thailand

GPA: 3.69 / 4.0 · First Honor Class

CONFERENCE

[1] L. Prum, et al., "Finding Picking Point Using Straight Line Detection of Label Attachment Machine," in *Proc. 26th International Computer Science and Engineering Conference (ICSEC)*, pp. 252–256, 2022. IEEE. DOI: 10.1109/ICSEC56337.2022.

PROFESSIONAL EXPERIENCE

Lecturer of Robotics and Automation

2026 – Present

Cambodia University of Technology and Science (CamTech), Phnom Penh, Cambodia

- Teaching undergraduate courses in robotics and automation. Developing curriculum incorporating hands-on project-based learning and research methodology.

Senior IoT Engineer

2024 – 2026

CMED Construction Company, Phnom Penh, Cambodia

- Led multiple proof-of-concept R&D projects from concept to working prototype, spanning IoT sensor networks, computer vision, and access control systems. Technologies: Python, Raspberry Pi, MQTT, STM32, Node-RED, Django REST Framework, PyTorch, LangGraph.

Senior Production Engineer (NPI)**2023 – 2024***SVI Cambodia Company, Phnom Penh, Cambodia*

- Led production engineering for new product introduction in SMT/box-build electronics manufacturing. Created manufacturing documentation, optimized production lines, and drove process improvements.

Automation Engineer**2018 – 2023***Cal-Comp Electronics (Thailand) Public Co., Ltd., Samutsakorn, Thailand*

- Designed and deployed PLC-based control systems with industrial robots (6-axis, SCARA) integrated via RS232/RS485/TCP-IP. Developed firmware for ESP32/ATMega328 microcontrollers and HMI interfaces.
- This role directly motivated my research direction: recurring failures of rule-based vision systems under changing factory conditions led me to pursue learning-based perception for robust robotic manipulation.

Internships (Production & Maintenance Engineering)**2017 – 2018***Denso Cambodia (Production Engineer) & HGST/Western Digital (Asst. Maintenance Engineer), Thailand*

- Supported new line transfers, jig/fixture setup, production/quality documentation (SOPs, Control Plans, PFMEA), and process improvement in high-volume electronics manufacturing.

LANGUAGES

Khmer (Native) · Thai (Fluent) · English (TOEFL IBT – 4.0 out of 6.0)

HONORS AND AWARDS

- Distinguished Engineering Student Award (2017) – The Engineering Institute of Thailand under His Majesty the King’s Patronage.
- 6th ASEAN Synchrotron Science Camp (2017) – Selected participant.
- Outstanding Achievement in Project Presentation (2017) – Cooperative & Work Integrated Education Program, HGST (Western Digital).

CONTINUING EDUCATION

- Machine Learning and Deep Learning Specialization – Coursera / Deep Learning. AI. Completed foundational and applied deep learning courses covering neural networks, CNNs, sequence models, and optimization techniques.
- Arm Cortex-M Architecture and Software Development Specialization – Coursera (Issued Aug 2025). Covered Arm Cortex-M processor architecture, embedded software development, and low-level system design.
- Hands-on Internet of Things – Coursera / University of Illinois Urbana-Champaign (Issued Mar 2024, Credential ID: 85VB5HJNTFMQ). Practical IoT system design including device connectivity, sensor integration, and data pipelines.
